

WRNSC Coach Mileage Policy

Updated 2024-01-17

This policy governs how WRNSC handles mileage expenses incurred by coaches and support staff while supporting athletes at races.

A capped pool of money is allocated to help offset driving expenses incurred by coaches. For the 2023-2024 season, \$4000 is allocated. At the end of the season, the budgeted money will be distributed proportionally to all coaches who have driven to events, based on the number of kilometres they have driven relative to the total number of kilometres driven by all coaches throughout the season (see example equation below). Distributions to coaches shall not exceed the mileage rate specified by the Canada Revenue Agency.

For this purpose, a coach will be defined as anyone driving to a race to assist athletes other than (or in addition to) their own children.

Compensation is to be provided from this fund only for races within the Southern Ontario District (SOD). For any races outside of the SOD, additional trip fees will be collected from athletes to provide compensation to coaches driving, at the discretion of the Program Coordinator(s). The Program Coordinator(s) will be responsible for recording the mileage driven by each coach at the end of the season.

$$\text{Coach compensation} = \text{Budget} * \frac{\text{Num km driven by coach}}{\text{Total km driven by all coaches}}$$
